

RIVERBEND

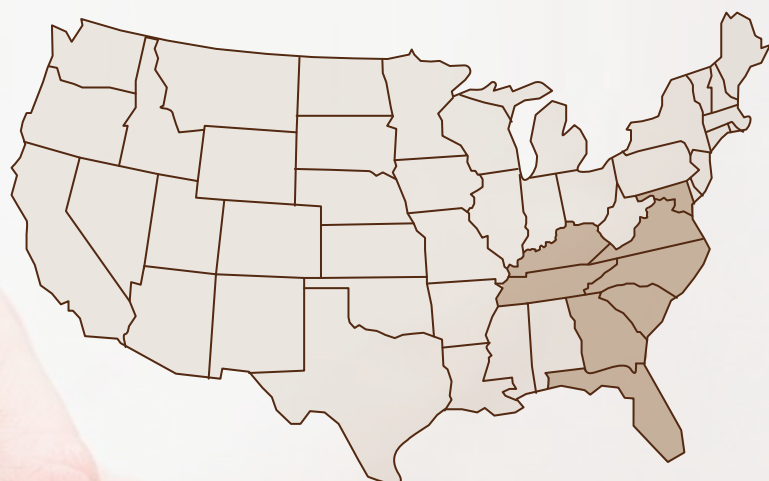

MALT HOUSE

10 YEARS AT A GLANCE

SUSTAINABILITY: FROM GRAIN TO GLASS

Partnering with Family Farms

We have purchased 7.5 million pounds of grain at premium prices from family owned farms in Georgia, Florida, Kentucky, Maryland, North Carolina, South Carolina, Tennessee, and Virginia.

Protecting the Grain Growing Environment

- We've repurposed 100,000 pounds of rootlets for the nearby ecosystem of local farmers.
- We've reduced 1,064,030 pounds of CO2 by sourcing locally.

That's the Carbon Dioxide Equivalent of:

112,523,911
gallons of gasoline consumed

120,423
homes' energy use for one year

2,315,211
barrels of oil consumed in one year

Providing for Our People

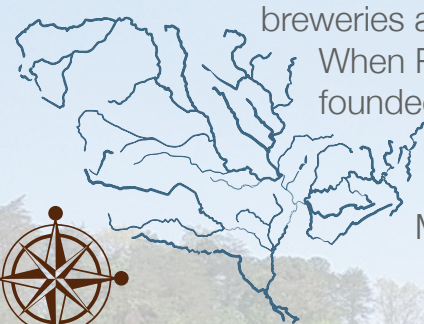

We've been Living Wage Certified since 2014 and have paid **100%** of employee healthcare insurance premiums since 2018.

TRAILBLAZERS FOR CRAFT MALT

Then

Craft malt hasn't always been available for breweries and distilleries. When Riverbend was founded, there was only one craft maltster east of the Mississippi River.

Now

We have partnered with more than 400 breweries and distilleries, and we're excited to now have the capacity to work with many more craft producers around the Southeast.

30 of our customers are Craft Malt Certified™, with 10 percent or more of their annual malt purchases coming from craft maltsters.

Though our focus is the Southeast, we've sold our malt in 27 different states, as well as Washington DC and Canada.
